## EIC 3600

STIC Database Tracking Number: 167258

**TO: Mark Fadok**  
**Location: Knox 5A21**  
**Art Unit : 3625**  
**Thursday, September 29, 2005**

**Case Serial Number: 09/933244**

**From: Caryn Wesner-Early**  
**Location: EIC 3600**  
**Knox Rm. 4B71**  
**Phone: 272-3543**

**caryn.wesner-early@uspto.gov**

### Search Notes

Here's your Fast & Focused search. Remember that it does not include all of the mandatory 705 databases, so if a full search of all databases is needed, you will have to submit the request for that separately.

I marked a few things, but I'm not sure if they're even as good as the art you already found. Hope it helps, anyway!

Caryn S. Wesner-Early, MSLS  
Technical Information Specialist

Is this a "Fast & Focused" Search Request? (Circle One) ☒ YES ☐ NO  
A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC3600 and on the EIC3600 NPL Web Page at <http://ptoweb/patents/stic/stic-ic3600.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

THE method provides for the advancement  
sending of a shopping CART from a manufacturer's  
site (First site) to a Retailer's site (second site)  
THE novel feature is THAT THE CART IS  
sent directly to the Retailers (check out)

## Voluntary Results Feedback Form

➤ I am an examiner in Workgroup:  Example: 3620 (optional)

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature  
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

**Comments:**

**Drop off or send completed forms to EIC3600 Knox 4B68**

Detailed Description

Claims

#### English Abstract

...conducting commerce over a distributed network (108) to manage merchant and product information in an **electronic shopping basket** (148), payment source information in an electronic wallet (140), and shipping address information in an...

#### Detailed Description

... information within a client-side shopping basket; view the contents of the shopping basket; and **transmit** encrypted shipping and/or **payment** information ( **stored** on the **consumer** computer) to the merchant Web site.

In accordance with one aspect of the invention, there...shopping basket; Figure 9 illustrates steps performed in viewing details about a product from the **electronic shopping**

**basket** ;

Figure 10 illustrates the steps performed in viewing and manipulating payment source data in the...to "Yes." The consumer then selects an option labeled, for example, "Add Item to Shopping **Basket** ." The **Web** browser 120 directs a corresponding message to the commerce client 122 causing information about the...

...product purchasing history to determine, for example, whether the refrigerator is still under warranty. The **electronic shopping basket** retains a complete, browsable history of all products purchased.

C. Communication Between Commerce Client and...embodiment, the Web documents 31 0 offer consumers options to add product information to an **electronic shopping basket** , view products collected but not yet purchased, view products already purchased, enter payment information into...option to the consumer which allows information about a product to be stored in the **electronic shopping basket** (in computer memory, and eventually written to a hard disk). The ADD ITEM option can...consumers to retrieve a list of all the products that have been placed inside the **electronic shopping basket** using the ADD ITEM option.

1 5 Figure 7 illustrates the steps in carrying out...s computer screen. The list of product names corresponds to all products currently in the **electronic shopping basket** which have not yet been purchased.

Web documents 310 also offer consumers a VIEW HISTORY...

...the system may also host a DELETE ITEM option to remove an item from the **electronic shopping basket** . Figure 8 illustrates the steps performed to carry out the DELETE ITEM option. In a...Friendly Name to be associated by default with product information that is added to the **electronic shopping basket** . Generally, a preferred payment source would be an often used credit card account perhaps offering...Friendly Name is associated with the default shipping address. Thereafter, any products placed into the **electronic shopping basket** will acquire automatically, by default, an association with the new shipping address. One skilled in...

...the electronic address book, the present invention enables a consumer to purchase products in the **electronic shopping basket** . **Web** documents host a READY TO BUY option.

Figure 12 illustrates the steps of purchasing a...Figure 12 are terminated and no purchase occurs.

With the unpurchased product items in the **electronic shopping basket** sorted by merchant (e.g. 'L.L. Bean' or "Sears"), a step 1220 divides the ...as determined by the step 1236, then the Flag field for every product in the **electronic shopping basket** is marked 'purchased' (i.

#### Claim

... comprising executable computer instructions stored on a computer storage medium accessible by the computer;  
an **electronic shopping basket** object configured to access and manipulate product information and merchant information stored on the computer...

...conjunction with the Web browser application, the commerce client application including a callable function;  
an **electronic shopping basket** function configured to store product information and merchant information to a computer storage medium accessible by the computer, said **electronic shopping basket** function comprising executable computer instructions stored on a computer storage medium accessible by the computer...

...conjunction with the Web browser application, the commerce client application including a callable function;  
an **electronic shopping basket** function configured to retrieve product information and merchant information from a computer storage medium accessible by the computer, said **electronic shopping basket** function comprising executable 1 0 computer instructions stored on a computer storage medium accessible by...The client architecture according to Claim 7, further comprising, on the computer-readable medium:  
an **electronic shopping basket** object configured to access and manipulate product information and merchant information stored on the computer storage medium, the **electronic shopping basket** function transmitting product information and merchant information to the commerce client application during execution of the product purchase function of the commerce client application, the **electronic shopping basket** object comprising executable computer instructions stored on the computer-readable medium.

9 ...comprising, on the computer readable medium:  
an electronic wallet object configured to access and manipulate **payment** source information **stored** on a computer storage medium accessible by the computer, the electronic wallet object **transmitting** payment source information to the commerce **client** application during execution of the product purchase function of the commerce client application, the electronic...

TEXT:

Even as small banks are being encouraged to set up their merchant customers on the **Web**, some big banks that pioneered such services are reportedly pulling back. Among them are Fleet...

...which previously had announced its intention to be the single source for merchant services-from **Web** site design and hosting to catalog and payment processing provision-now largely limits itself to the **payment** end. The bank's virtual **store** provider, Empressa, dissolved late last year. Fleet won't say how many **Web** merchant customers it has now, as compared with the 120 it had last July. Other...

...an executive with First Union who For example, played a key role in its merchant **e**-business offering, left the bank this spring. About a month ago, ABN Amro Corp. told BTN that it had yet to find any takers for a bank **Web** site development offering, something that merchants previously appeared to want. "I don't know what...

...a product and now I don't know where they are." The bank began offering **Internet** credit card transaction acquiring last December and has about a dozen businesses using that service, SurePay. However, at press time no **customers** had come **forward** for a **Web** site development program, eCreator, that the bank introduced in February. Ironically, Empressa "dissolved," as Radner...

...Greg Radner, marketing manager for business payment solutions, says Fleet is now "less interested in ( **Web** ) site building and more interested in commerce-enabling merchants' existing sites." The bank still offers **Web** design and hosting services that have lately attracted several, albeit small, merchant customers, Radner adds...

...Radner says. Up until late last year, Fleet merchants had to use Cybercash for their **Internet** payments gateway. Now the banks supports multiple gateways, which, Radner says, makes it easier for Fleet to support merchants that come to the bank with their shopping **Web** sites already in place. The executive most involved in First Union Corp.'s merchant offering ...

...it is considering doing so as part of its expansion of what Alexander terms "a **basket** of services for small and midsize businesses." (By First Union's definition, that's those...However, Steve Klebe, vice president of payment alliances at CyberSource Inc., a San Jose, CA, **Internet** payment gateway and provider of various ecommerce services to merchants, says that

banks have largely...

...order to buy a  
product.

The most popular way to manage orders is through shopping **cart**  
technology.  
The customer goes through the site and picks items s/he wants to buy...

...check out, s/he fills in billing details and purchases the items.  
Building a  
shopping **cart** requires programming knowledge or a software package that  
can  
manage the behind the scenes work...  
...t have a printer? What if they don't have a stamp handy? If  
they **send** an email, will they get a confirmation **sent** to them?  
**Customers** want  
an acknowledgement of their order.

Can **customers** pay online with a credit card? They increasingly like  
the  
convenience of this. The order...

**TEXT:**

...procurement may become more efficient--but payment and settlement issues abound.

BY RICHARD GAMBLE

With electronic trading ventures being announced almost every week, the heralded potential of e-commerce to revolutionize purchasing and trading practices is rapidly being realized. What's less obvious is that conventional payment and settlement practices also may be transformed by the e-revolution.

The new "exchanges" are beginning to position themselves as payment intermediaries, connecting purchasers with networks of banks and other

lenders while relieving suppliers of their trade credit burdens...  
...credit term negotiations, payment mechanisms, liquidity management, cash forecasting and cash management.

To be sure, e-payment methodologies are in their infancy, and numerous strategies are being explored. Most business-to-business (B2B) e-marketplaces today happily introduce buyers and sellers through their sites and then send them offline...

...to initiate collection when payments are overdue. A small but growing number are working with e-commerce support businesses or directly with lenders and buyers to allow settlement to occur over...

...to goods sold, some are collecting payments and then paying the seller. Welcome to an **electronic** world where float is back in play.

The catalyst, of course, is the rapid rise...

...comparison--shop among the many suppliers participating in the marketplace, fill up a "virtual shopping **cart**" and buy everything in one transaction. This replaces the labor-intensive task of placing orders...

**TEXT:**

...the customer directly, then pay you less their fee. You can integrate this into your **Web** site so the customer isn't inconvenienced and doesn't see a significant difference in...

...http://ibill.com), which offers a billing service for sites selling intangibles (services or subscription **Web** sites). The company charges 15% of total revenues for amounts up to \$10,000 per...

...be sure you have the software or services in place to accept orders through the **Internet** . In most cases, as buyers browse your site they'll collect merchandise using shopping- **cart** software. Many ISPs offer this software as part of an **e** -commerce package, and there are many third-party shopping- **cart** applications you can buy. Prices range from free for simple **cart** -only scripts such as PerlShop or GTA NetOrderForm to \$369 for a 12,000-order...

...JustAddCommerce plug-in for FrontPage sites. Many database-oriented commerce software packages have integrated shopping **carts** .You don't need to be concerned about security during this part of the process...

...such as credit card numbers. A closed padlock on the status bars of both Microsoft **Internet** Explorer and Netscape Navigator indicates a **Web** site is using the secure protocol, as does an "S" after the HTTP in the URL.

Next, the order goes to the **Web** server. Most **e**-commerce packages let you retrieve orders via a **Web** page interface. This should be done via secure HTTP as well, because it includes the...

...of order processing, you can use a service to handle most of the details. When **customers** are ready to **check out** of your **store**, you **send** them to the service bureau's secure server instead of handling it on your own...

...then gives you a secure way to retrieve these approved orders, typically through a secure **Web** page. For example, Open Market's ShopSite offers these services for about \$100 a month.

The most hassle-free way to run your **Internet** store is to use a provider that offers the shopping card and secure transaction features to host the **Web** site. Some, such as Yahoo Store, sell their services directly to merchants. Others, such as...

...a purchase, buyers want reassurance their order is being processed. Since they bought via the **Internet**, you should provide some way to track the order through the **Internet** as well. At a minimum, you should offer quick replies to **e**-mail inquiries about order status or requests for returns. Better yet, answer the questions before they're asked. Once you ship the order, use the package carrier's **Web** site to provide order information to your customers. **E**-mail the tracking number to the customer, along with instructions for using the carrier's online tracking feature. If possible, offer your own **Web**-based tracking so customers can track their orders in real time at your site.  
Customer...
